

2019年6月22日 雅思听力真题回忆

Section 1

场景：住宿

题型：填空

内容概述：兴趣班课程介绍

Microwave

Reception

Shower

18

Lake

Tennis

Fishing

forest

arataki

Section 2

标题：

题型：

内容概述：海边的活动

A: to help fund development of young artists;

B: talks from exhibiting artists;

B: talking photographs;

C: clean the tables

Section 3

场景：

题型：

内容概述：作业讨论

talking about the assignment;

purposes

technology

headlines

Section 4

标题：

题型：

内容概述： 食物文化

Winter

Tools

Whales

Milk

Woods

Ships

Fertilizer

Ceremony

furs

2019年6月22日 雅思阅读真题回忆

Passage 1

题目：日本木雕大师 Katsushikan Hokusai

判断题+填空题

文章主旨：个人传记

第一段：

第二段：

第三段：

.....

判断题

填空题

Passage 2

题目：北极狐的迁徙 Artic Fox

标题配对 6+填空题 5+多选题 1

文章主旨：动物话题研究

Passage 3

题目：澳大利亚土地盐碱化 salinity

题型：段落信息配对题 6+AB 信息配对 3+单选题 4

文章主旨：盐碱化对农业的影响

2019年6月22日 雅思写作真题回忆

Task 2

类型 社会类

题目 As countries develop, more and more people buy and use

their own cars. Do you think the advantages of this trend for individuals outweigh the disadvantages for the environment?

范文

Mass car ownership in many cities has become a concern to increasingly more people today. Nevertheless, owing a car is still seen as a desirable option to many. While some might argue for the convenience of having a car, I think the wide use of cars have compromised the environment in an alarming rate. People today cross towns and cities in their cars for work purposes and lei sure activities. This mode of transport grants people the flexibility of moving around without the hassles of having to book tickets for airplane, train or bus travel. Personal independence derived from this also means people can go for shopping and other pursuits whenever and at any time without depend/ing on fixed schedules of public transport systems, which can be important when there is severe deficiency of public transport.

However, the effects of car pollution are widespread, affecting air/soil and water quality. Nitrous oxide contributes to the depletion of the ozone layer which shields the Earth from harmful ultraviolet radiation from the sun.

Nitrogen dioxide and other chemicals mix with rainwater to create acid rain that damages crops, forests and other vegetation and buildings. Oil and fuel spills from cars seep into the soil near highways, and fuel and particulates from vehicle emissions contaminate lakes, rivers and wetlands. Besides, car pollution is one of the major causes of global warming which is believed to be one of the most urgent environmental issues faced by mankind. Cars emit carbon dioxide and other greenhouse gases, contributing a major part of total global warming pollution. Greenhouse gases trap heat in the atmosphere and it causes worldwide temperatures to rise. Warmer global temperatures affect farming, wildlife, sea levels and natural landscapes. To conclude, over-dependence on private vehicles and lack of the awareness of environmental protection of the public have caused immediate and long-term effects on the environment, but efforts could be made to reverse.
